I only go to the radiologists of Vision Imaging of Kingston. You have a choice. Tell your doctor to send you to Vision Imaging.”

I was treated with kindness and respect from the moment I called to schedule the appointment. The facility was beautiful and the staff was courteous and professional.

I was most impressed by the fact that Dr. Lafond reviewed my mammogram and discussed the results during my visit. ”

My X-rays were read before I even left the building and the results were provided immediately to my doctor.

When I arrived home I already had a message telling me that my foot was, indeed, broken. The only thing they could improve this would be to put in a drive-thru service.”

They let my mom stay with me the whole time, and I wasn't afraid anymore.”
